Here are the 'New Classics' from Khan Arms!

SETTER (Aluminum or Steel receiver) and **SETTER PREMIUM** (Steel receiver) models are setting the new standards for Over & Under shotguns.

SETTER Aluminum models feature an ultra light alloy receiver with modern lines and laser engravings ①. Light alloy receiver is accompanied by a simple but durable Extractor on the barrel. **SETTER** has a sporty design barrel rib and a top lever, along with fine standard Turkish walnut stocks. **SETTER** models are available with Steel receiver as well.

SETTER PREMIUM models feature a steel receiver with color case hardening ② or nice acid-etched engravings and 24K gold inlays ③. Classy engraving details on top lever, trigger guard ④ and forend latch ⑤ enrich **PREMIUM** models along with carefully selected Turkish walnut stocks. Steel Receiver models can be built with Ejector or Extractor per preference.

All **SETTER** and **SETTER PREMIUM** Receivers are precisely CNC machined, Barrels are deep drilled from 4140 Steel material. They all feature a Single Selective Trigger and an LPA® Fiber Optic Bar Front Sight ⑥. 'Length of Pull' 'Trigger Pull Weight' and 'Forend Latch Tightness' can be adjusted/customized.
